Discovery of a Curious Bowlder, The workmen engaged in lowering the grade of Third street uncarthed a large bowlder, that would probably weigh several tons, imbedded in the earth in front of the court house, and a blast of powder was put in and the upper part of the stone

The formation of this bowlder is curious in the extreme. The larger portion of the rock is composed of sandstone, but imbedded in it are numerous pebbles, lumps of coal, and one gentleman dug out what is claimed to be a piece of petrified wood. On the surface of the broken stone was found the perfect impression of an oak leaf, although the leaf itself was not to be

The rock is composed much like gran-ite, and is harder than the ordinary build-

ing stone used in this vicinity. "I have seen several of these rocks," said a gentleman who was examining a piece of the bowlder. "It is what is commonly called a 'rolling stone.' That stone start-ed from heaven, and has rolled along until it finally became imbedded in the soil where it now is. Every time it was moved slightly by some action of frost or some other forces of nature it increased in size until it is what you now see it-a mammoth bowlder.

"I saw some of these stones broken open In a river bed in Dakota, and a petrilled fish and snake taken out, besides other cu-rious things, and have heard of living toads being taken from such stones before ow. It is a very curious formation."cattle Press.

A Queer Funeral Direction. The story is told of a certain Frenchman who had been a great collector of coins. By his will be directed that his obsequies should be performed with every accompaniment calculated to inspire mirthful feelings. His body was to be wrapped in tunned pig skin and buried coffinless in a standing position upon a pile of charcoal. Laurel branches were to be carried by the mourners, and on returning from the church they were to throw open the chambers in which his treasures were deposited and all comers were welcome to help themwere filed for record in the office of the selves as they pleased to the contents. It was a sore disappointment to the public, however, to find that before they were admitted the servants of the deceased had lecamped with everything that was portable. Casseil's:

Scaly Skin Diseases.

Psoriasis 5 years, covering face, head. and entire body with white scabs, Skin red. itchy and bleeding. Hair all gone. Spent hundred of dollars. Pronounced incurable. Cured by

Cured by Cuticura.

Cured by Culicura.

My disease (pecciasts) first broke out on my left cheek, spreading across my nose, and almost covering my face, it can into my eyes, and the physician was afroid I would lose my eyes that allogether. It spread all over my head and my hart all full out my lift was entirely bubli-headed it then broke out on my arms and Shoulders, until my arms were just one sore. It covered my entire body, my face, head and other being the worst. The white scale fell constantly from my head, shoulders and arms the skin would thicken and breed if stratched, after spending many hundreds of dollars, I was pronounced harmable. I hierard of the Curricura, Headenburg, and after using two and after I had taken four bottles, I was almost cured; and when I had suffered for five years. I thought the disease would leaven very deep sear, but the Curricura Bringeries cured it without any scara, I can hid express with a pen what I suffered before neing the Curricura Remains. They have saved usy life, and I feel it my duty to recommend them. My har is restored as good as ever and so be my eyes.

Mus Rosa Relly, fockwell city, Iowa.

My disease (pecciasts) first broke out on my left in the trusted of the first broke out of their subject to find his with a simple chop; he greets them all with a subdeed, chastened, and respectful air of pleased familiarity, which ends charms extra pence out of their pockets.—

Murray's Magazine.

Enumerating the census begins tomorrow in connection with our June sale. The chance of a lifetime to buy dry goods cheap and get one of the above prizes.

The English Walter. It is no light task to enter for eix or seven tables occupied by a hungry and clamorous crowd constantly coming and going. The strain on the memory is exceedingly great, and the attention must forever be as much on the alert as though the waiter were a conjurer keeping sixteen balls going at once in the air. Yet there are men who ever make a mistake of any kind, none o their customers growl over a chop when he

ordered a steak, no one rejects with disdain a barbarous fried sole that comes in place of the more civilized grill, nor does any man, having once found his change wrong count it again and again with an air of dis-This kind of waiter would disdain to add

ed; he is not only a mere honest man, he is a gastronome of some merit as well, and can be trusted to recommend what is really good. He knows what the "regulars" wunt, he is aware of one man's idiosyncrasy

but it exists equally when the room is dark. That fact is too often overlooked. Carlous Infirmity of Hearing. Editor Cowles, late of The Cleveland Leader, was the victim of a singular in firmity of hearing. It partook somewhat of the nature of color blindness, as that affects the eye, he being unable to hear certain sounds at all. For example, he never heard the song of a kird in his life. A whole room full of canaries might be in full song, and yet he could not hear a note, but the rustle of each tiny wing would be plainly audible, such sounds being dis-tinctly materialized on the tympanum of his ear. He could hear all the vowels, but there were many consonants which he never heard. He could hear a man whisper, but could not bear him whistle. The un strument were as nothing to him, but the lower notes could be heard without difficulty.-St. Louis Republic.

Mimetism in Birds' Eggs. It is by no means unusual to find thrushes' eggs quite destitute of spots, globular in form, and no larger th marble; while others are taken with all the blotch at the larger end. But by far the most extraordinary markings in birds' eggs are due, without doubt, to mimetism. The writer has a guillemet's egg upon which are depicted most faithfully, in black and sepin, the numbers 10 and 7 and the word Joe. These are by no means hieroglyphics, but are as well executed as many a schoolboy's figures and writing. Upon the same egg are also to be seen rude sketches of heads of several grotesque figures.-Hard wicke's
